MALE AND FEMALE STUDENTS.**

### BRIEF DESCRIPTION OF THIS PROGRAM

The Construction Trades course offered through Carlson High School is a rewarding course that will help juniors and seniors to meet other curricular standards like senior math and visual arts, while attending to a rigorous Construction Trades schedule. The construction Trades schedule will center itself on a real construction project (or projects) designed to give students the practical experience they will need to be successful in the real world of construction. Students in this program can expect to enjoy this class and also leave with a variety of skills and knowledge that will be beneficial to their futures in the construction trades. Students considering future college degrees in architecture, civil engineering, surveying, and construction management technology should know they will be well prepared for these degree programs after completing this program. So you can clearly see that this Construction Trades Program is committed to the future success of all our students.

### SPECIAL FEATURES OF THIS PROGRAM

All students enrolled in Construction Trades are given special driving privileges due to the nature of the jobsite style classes. Students will have the option of participating in charity type projects and will also be offered participation in Skills USA. School improvement projects are also offered to students allowing them to express their school pride. The most exciting thing about this class is that the instructor is sincerely dedicated to making this class the most enjoyable, most rewarding class available to any high school student in the DCTC affiliated schools.

## **DCTC**

**Proud To Bring Career-Technical Education To Our Students At:  
Airport, Flat Rock, Gibraltar-Carlson, Grosse Ile, Huron, Riverview,
