

Definition of a completer:

A student who is an 11th or 12th grade student who is enrolled and reported as enrolled in the program and has completed a designated instructional program according to the school district's criteria. If the program requires two years of training for a student to meet the requirements of an entry-level job, the student may be counted only at the end of the second year.

To determine completer status, answer four yes-or-no questions regarding each student who was enrolled in a CTE program:

1. Did the student complete a sequence of courses or equivalent instructional units in a recognized CTE program?
2. Does the student's GPA for this sequence of courses/instructional units equal a 2.0 or better?
3. Is the student ready to be successful in further training or post-secondary coursework related to the student's CTE sequence of courses/instructional units?
4. Is the student ready to be successfully employed based on the student's CTE sequence of courses/instructional units?

If the responses are yes to questions 1, 2 and 3 or 4 then the student is considered a CTE program "completer".
